

# Brent/Fred/post-doc

- Mid-late 2004, benchmarking and basic validation of RAMS in East Africa, or previously optimized RegCM will save time on this
- Early 2006, completion of arbitrarily chosen land cover perturbation cases of model
- Going forward—further refinement of LULC scenarios (with input from LU group) and full feedback

# Jean

- Training of statistical downscaling methods, mid-2004.
- Analysis of long-term time series, early 2005

# Ruth

- Relating climate to biome types--BIOME-III  
2004
- Analysis of monthly time series, relating  
this to circulation types. 2005

# Jeff/Phil

- Prepare Model Simulations, collect, process necessary weather, auxiliary data (Eco: DEC 03, Ag.: SUM 04)
- Validate simulations, run with historical data, process/analyze output (Eco: SUM 04, Ag. WIN 04)
- Run sims with projected future data, analyze output, interactive sims with LULC (Eco: WIN 04, Ag: FAL 06)
